

A FAMILY AFFAIR

FOLLOWING THE SUCCESS OF ITS EXCLUSIVE KIDS' OFFERING, HAPPY KIDS DENTAL NOW OFFERS A COMPREHENSIVE SERVICE FOR THE WHOLE FAMILY

What do we think of when we hear the word 'family'? Fun times, sanctuary, fond memories, lifelong bonds – it's these reponses that siblings Roksolana Mykhalus and Yevhen Hunyak wanted to tap into with their practice, Happy Kids Dental. Their mission was to overturn tired preconceptions about dentistry and create a family-inspired dental surgery that would be associated with fun and happiness.

One of a small number of dedicated children's dentists in the UK, Happy Kids Dental was designed to be child-friendly, without being anathema to frazzled parents. Its age-zoned waiting areas are filled with toys and tech, and the consultant-led team includes paediatric dentists, nurses and therapists who have extensive experience working with children.

The practice offers methods and techniques not commonly available from traditional dentists – such as early orthodontics, which prevent the need for invasive treatment in the future. Supported by a suite of state-of-the-art equipment, the team successfully creates fun, positive and fear-free dental visits.

With few practices in central London able to rival Happy Kids Dental's combination of technology and experience, it's no surprise that parents were soon clamouring to be seen alongside their children. The business responded swiftly, expanding both its team and treatment menu to create a truly comprehensive offering for the whole family.

The clinical team includes a renowned restorative dentist, who specialises in highly aesthetic, minimally invasive techniques. Bespoke cosmetic solutions, such as teeth whitening, are a major focus, while the orthodontics department includes a consultant and a specialist who can address the most complex cases using advanced, lifestyle-friendly teeth-straightening systems. And with a dedicated sedation suite, the practice can offer both inhalation and IV sedation in relaxing surroundings that don't feel clinical.

Whether you're an adult or a child, every patient at Happy Kids Dental is treated with individual care and consideration, and given all the time they need to feel relaxed and confident about their dental visits.

Because family is so important to the practice, it has worked hard to offer a completely seamless experience that won't infringe on busy schedules. Evening, weekend and out-of-hours emergency appointments are available year-round; families can be seen in a single block booking; and the practice is developing relationships with additional services, such as stem-cell banking and private concierges.

If you thought a dentist couldn't ever be aligned with the emotive language of families – perhaps the playful, relaxing sanctuary that is Happy Kids Dental will make you think again. ■
